Re: Human Arc

Dear Henry:

It is with great pleasure that I write this letter of recommendation on behalf of Human Arc, a company specializing in assisting birth mothers improve access to healthcare and other community resources. My personal experience, as well as the experience of my agency, Heart of Adoptions, Inc., has been exceptional. Human Arc provides a phenomenal service to the birth mothers with whom we work and qualifies them for Medicaid and other services to which they are entitled. The cumbersome bureaucratic process normally associated with Medicaid is handled with efficiency and success. Human Arc removes the stressors associated with this process from your organization and the birth mothers. The adoptive parents are grateful that these resources are available to cover the medical costs associated with their child's delivery, and often the child's medical expenses as well, so it is a win win for all.
